

Unmanned Aircraft Systems

Join us at the Watsonville Airport Fly-In to learn the basics of Unmanned Aircraft Systems (UAS) and how they are inherently different from manned aircraft. Introducing UAS into the nation's and local airspace is challenging for the FAA and aviation community. This seminar gives a basic look into not only the variety of shapes and sizes but how to promote safe but responsible use of unmanned aircraft through the "Know Before you Fly" program.

Directions: From HWY 1 Exit on Airport Blvd and head North on Airport Blvd. Make a left Turn on Aviation Way (0.7Mi from HWY 1) and destination will be on the airport side.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
